Detailed Build Plan: X / Twitter (Official) MCP Server Integration

MCP Server: Official X MCP (<http>)
Type: <http>
Priority: Medium-High (research + content)

Purpose

Give agents live access to X (Twitter) for research, trend monitoring, and drafting posts directly from the control panel.

Key Features

- Real-time X search
- Bookmark management
- Draft and publish Articles
- Fetch trends/news

Integration

- Dedicated “X Research” panel in the control panel
- When agent needs current events or social proof, it can use `x__search_posts`
- Support for posting drafts created during coding sessions

Implementation Notes

- Uses official hosted MCP: <https://api.x.com/mcp> (or similar)
- OAuth via X Developer Portal + Grok’s credential system
- Add “X Integration” section in Config browser

Security

- Minimal scopes (read + draft only where possible)

Use Cases: - Research latest discussions on a library - Draft announcement posts for new features - Monitor mentions of the project
